

IN THE CLAIMS:

Please ADD new claims 19-21.

1-14. (Cancelled)

15. (Previously Presented) A method for displaying channel information on a display device for receiving multichannel television broadcasting, comprising:

selecting a major channel number on a channel select menu of said display device; and
displaying simultaneously a major channel number and at least one minor channel number of programs received through said major channel;

wherein said channel select menu includes a scroll bar window having a scroll bar to display the channel numbers of partial channels corresponding to a position of a scroll bar.

16. (Previously Presented) The method as claimed in claim 15, further comprising:
determining if one of the channel numbers displayed on a channel window of the channel select menu is selected; and

if one of the channel numbers is selected, selecting a channel of the selected channel number.

17. (Previously Presented) The method as claimed in claim 15, wherein the displaying further comprises displaying the channel numbers corresponding to the minor channels without displaying the channel number corresponding to the major channel.

18. (Previously Presented) The method as claimed in claim 15, wherein the displaying further comprises displaying the channel numbers corresponding to the minor channels and displaying the channel number corresponding to the major channel.

19. (New) The method as claimed in claim 15, wherein the displaying comprises displaying the major channel number as "X" and the minor channel number as "X.Y," wherein X and Y represent numerals.

20. (New) The method as claimed in claim 15, wherein the displaying comprises displaying the minor channel numbers and the major channel number simultaneously.

21. (New) The method as claimed in claim 15, wherein the displaying comprises displaying in a format of $X, X-1, X-2 \dots X-n$, wherein X is the major channel number, $1, 2 \dots n$ are minor channel numbers, and n is the highest minor channel number.
